

REMARKS

Claims 2, 6 and 15-18 have been cancelled, and claims 1, 4 and 9-14 has now been amended to more definitely define the glass transition temperature of the dielectric materials and obviate the rejection. Support for the amendment of Claim 1 can be found in the Specification in the Examples on pages 10-11, and in Table 1, which shows a plurality of polyester based resin dielectric materials having different glass transition temperatures. In addition, the dependency of claims 9-14 has been changed since claims 2, upon which several of the claims herein depended, is cancelled herein. The present amendment is deemed not to introduce new matter. Further, it is believed that the present amendment raises no new issues and does not require a new search since the Examiner recognized in the final Office Action that there is support in the Specification for the now claimed glass transition temperature. Claims 1, 3-5, 7-14 and 19 remain in the application, Claims 7 and 8 having been previously withdrawn.

Reconsideration is respectfully requested of the rejection of claims 1-6 and 9-19 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

With regards to claim 1, said claim has now been amended to limit the glass transition temperature of the dielectric material to from 25°C to -29°C, as illustrated in the Examples of the instant Specification. As the Examiner recognized in the instant Office Action, this temperature range is disclosed in the Specification. With regards to claims 2, 6, and 15-18, said claims have now been cancelled herein.

In view of the amendments presented herein, it is believed that the rejection is now moot. Withdrawal of the rejection is accordingly respectfully requested.

In view of the foregoing, it is respectfully submitted that the application is now in condition for allowance, and early action and allowance thereof is accordingly respectfully requested. In the event there is any reason why the application cannot be allowed at the present time, it is respectfully requested that the Examiner contact the undersigned at the number listed below to resolve any problems.

Respectfully submitted,

Donald E. Townsend, Jr.
